

ALEXIS RACUK

QA Engineer | Mobile Test Automation | Xray · Appium · Java · Gherkin
Buenos Aires, Argentina | alexracuk7@gmail.com | [linkedin.com/in/alexis-racuk](https://www.linkedin.com/in/alexis-racuk)

PROFESSIONAL SUMMARY

QA Engineer with 8+ years of experience across manual and automated testing for mobile, web, and API-driven applications in fintech, retail, and enterprise environments. Skilled in test strategy design, test case management (Xray, Azure DevOps, JIRA), defect tracking, API testing, and ETL/data validation. Currently leading the QA strategy for a suite of mobile wallet applications (iOS & Android) and driving the adoption of mobile test automation using Appium, Java, and Gherkin (BDD). Actively expanding automation expertise in Selenium and Playwright through ongoing coursework, in line with current industry demand. Strong track record collaborating with cross-functional teams — Development, Product, and Cybersecurity — in Agile/DevOps environments.

CORE SKILLS

- **Test Automation:** Appium, Selenium, Cypress, Ranorex, Worksoft Certify — currently expanding into Playwright
- **Programming & Scripting:** Java, Python, SQL, PHP, Gherkin (BDD)
- **Test Management & Tracking:** Xray, Azure DevOps, JIRA, HP ALM, Trello
- **API & Integration Testing:** Postman, Swagger UI, RESTful APIs
- **Testing Types:** Functional, Regression, Smoke, Integration, End-to-End, Mobile, Cross-Browser, ETL/Data Validation
- **Databases:** SQL Server, MongoDB
- **DevOps & Collaboration:** Git, GitHub Actions, CI/CD, LaunchDarkly, Agile/Scrum

WORK EXPERIENCE

QA Engineer — Credencial Payments (Remote)

Dec 2025 – Present

- Leading the QA strategy for a suite of mobile wallet applications (iOS & Android), including a full analysis of critical and high-priority user flows across the product suite.
- Designed and documented the complete test case repository in Xray, establishing traceability and sprint-level visibility into QA execution for both iOS and Android.
- Driving the transition to mobile test automation; led risk and security analysis in partnership with Cybersecurity and Development teams ahead of implementation.
- Building a test automation framework using Appium, Java, and Gherkin (BDD) to increase coverage and execution efficiency.
- Mentored a junior QA engineer, supporting task distribution and quality standards across the team.
- Designed and executed manual tests for RESTful APIs using Postman, validating endpoints, request/response structures, and status codes.
- Reported, tracked, and validated defects using GitHub; supported CI/CD workflows with GitHub Actions.
- Executed Smoke, Regression, and End-to-End testing across multiple environments.

QA Engineer — Solvo Global (Remote) — Client: Upkeep

Apr 2025 – Oct 2025

- Performed ETL and data validation testing, verifying data integrity, consistency, and transformation accuracy across multiple systems and databases.
- Executed SQL queries to verify business rules, record counts, duplicate handling, and data accuracy throughout ETL pipelines.
- Designed and executed manual test cases for RESTful APIs using Postman and Swagger, validating endpoints, response data, and integration flows.
- Managed feature flags using LaunchDarkly to support canary releases and staged rollouts.
- Performed cross-platform testing across mobile devices and browsers; recorded and tracked defects in Azure DevOps Server.
- Executed Smoke, Integration, Regression, and End-to-End testing across multiple environments (GitHub, GitHub Actions).

QA Engineer — Tecnosoftware, Buenos Aires

Sep 2024 – Feb 2025

- Designed and executed manual test cases based on product requirements and user stories.
- Logged and tracked defects in JIRA, ensuring timely resolution with development teams.
- Performed regression testing for new releases and conducted exploratory testing to uncover edge cases and usability issues.
- Collaborated with developers, product managers, and stakeholders to clarify requirements throughout the development lifecycle.

QA Engineer — TPS, Buenos Aires

Aug 2022 – Aug 2024

- Developed automated test scripts using Ranorex and Cypress.
- Performed cross-platform testing across mobile devices and browsers; recorded and monitored defects in Azure DevOps Server.

- Executed Smoke, Integration, Regression, and End-to-End testing across multiple environments; managed version control with Sourcetree.

QA Engineer — Intive, Buenos Aires

Feb 2022 – Aug 2022

- Designed and executed manual test cases based on functional requirements and user stories, ensuring adequate coverage across features.
- Performed API testing using Postman, Recurly, and Swagger UI, validating endpoints, request/response data, and integration behavior.
- Tracked bugs and test results using JIRA, working closely with developers to prioritize and resolve defects.
- Performed database validation testing using MongoDB to verify data integrity and consistency.
- Participated in daily stand-ups and sprint planning within an Agile team environment.

Test Engineering Ssr. Analyst — Accenture, Buenos Aires

Feb 2021 – Mar 2022

- Developed and executed automated tests using Worksoft Certify for SAP and web-based applications.
- Coordinated test execution and reporting with international teams across different time zones.
- Documented test results and defects, ensuring clear traceability for stakeholders and QA leads.
- Gained exposure to security testing protocols and emerging testing technologies within an enterprise environment.

QA Tester / Jr. Developer — Gestión Cervecera, Quilmes

Aug 2019 – Feb 2021

- Created and maintained manual test cases in Azure DevOps Server based on business and functional requirements.
- Executed functional and regression testing to validate new features and fixes prior to release.
- Logged and tracked defects using Trello, coordinating with the development team for resolution.
- Assisted with development tasks using SQL Server and Visual Studio IDE, supporting both testing and coding workflows.

QA Tester — IT Resources S.A., Buenos Aires

Apr 2019 – Aug 2019

- Performed unit, smoke, integration, and regression testing across multiple devices and environments.
- Designed manual test cases from functional specifications and documented test results.
- Conducted SQL queries for data validation, ensuring accuracy and consistency across test scenarios.
- Reported defects and collaborated with the development team to verify fixes.

QA Tester — IBM, Buenos Aires

Jul 2018 – Feb 2019

- Created and executed manual test cases using HP ALM, aligned with functional and business requirements.
- Performed database validation testing using SQL, SAP, and IBM AS400 to verify data accuracy and integrity.
- Logged, tracked, and retested defects, coordinating with development teams to ensure timely resolution.
- Contributed to test planning and execution within a structured, enterprise-level QA process.

EDUCATION

- **National University of Quilmes** — Bachelor of Music and Technology (In Progress)
- **Technical School EET N°2, Bernal** — Electronic Technician, Programming Orientation

CERTIFICATIONS & CONTINUING EDUCATION

- **Professional Testing Master** — UTN (Universidad Tecnológica Nacional)
- Worksoft Certify for SAP GUI 2.0
- Worksoft Certify for Modern Web Applications 2.0
- Introduction to Worksoft Certify & Certify for Modern Web Applications (Combo Course)
- Introduction to Worksoft Certify Automation & Certify for SAP GUI
- Introduction to Worksoft Certify Automation 2.0
- Currently pursuing coursework in Selenium and Playwright for web test automation

LANGUAGES

- **English:** Advanced (experience working with US-based clients)
- **Spanish:** Native

PROJECTS & INTERESTS

- **Electronics:** Arduino-based development projects
- **Programming:** Personal projects in C and Assembler
